Biography

Melodic Groove Metal, what more could you want? Source of Rage from Lower-Saxony/Germany is the prototype exactly for that. In particular for making you bang your necks beyond good or evil while still delivering catchy melodies paired with technical refinement – to be clear, Source of Rage is representing exactly everything you need for getting the vibe and groove of heavy music and having a good time with a nice and cool drink.

Oliver Roffmann and the three brothers Marko, Riko and Thilo Krause are the perfect musical and personal matchup. It fits like a fist on the eye. The first EP – entitled *antagonize* – was written, recorded and released in 2015, followed by the full-length-debut *Realise the Scope* two years later, which was recorded at Institut für Wohlklangforschung/Hannover. The album deals with the topics of friction, aggression and therefore resulting positive energy within the people.

In the course of the next two years Source of Rage set themselves the goal to create this positive energy playing as many shows as possible. This led to the first place in the german final of the Wacken Open Air Metal Battle earning a slot at Wacken Open Air and Dong Open Air together with bands like Kataklysm, Alestorm, Insomnium and many more. Furthermore, Source of Rage released several music- and live-videos promoting the current album and gained experiences on international stages. *Realise the Scope* is a witty bastard pairing driving bangers and atmospheric songs to feast on. That is exactly what defines a successful mixture of Melodic and Groove Metal and that is especially the driving force for Source of Rage at their gigs in the future.
